Microscopy is also a hobby enjoyed by millions worldwide. The amateur microscopist is not a child playing with a toy microscope (though that's a fine time to start), not a student, and usually not a professional microscopist, but is someone who enjoys a technical hobby just for the fun of expanding the mind. To them, the microscope is a tool that opens wonderful new worlds of inquiry and discovery.

If you are serious about microscopy as a hobby, then I have to disadvise you from purchasing these devices. Microscopes are precision technical instruments and the low cost of toy microscopes simply does not allow them to keep up with the demands of the more serious enthusiast. The resolution of the optics is lower. Stability can also be an issue.

Home and Hobby. Microscopes for kids and hobbyists include good quality, affordable compound microscopes for everyday use. We recommend monocular microscopes for younger kids but remember, they should view with both eyes open! Binocular microscopes become the recommended microscope as soon as their eyes are wide enough apart to use two eyepieces.
