Precision-Guided Munitions: Background and Issues for Congress
Over the years, the U.S. military has become reliant on precision-guided munitions (PGMs) to execute military operations. PGMs are used in ground, air, and naval operations. Defined by the Department of Defense (DOD) as “[a] guided weapon

Precision-Guided Munitions: Background and Issues for Congress

A precision-guided munition is a guided munition intended to precisely hit a specific target, to minimize collateral damage and increase lethality against intended targets. During the First Gulf War guided munitions accounted for only 9% of weapons fired, but accounted for 75% of all successful hits. Despite guided weapons generally being used on more difficult targets, they were still 35 times more likely to destroy their targets per

Precision Guided Munitions

USAF Target Designators and Precision Guided Munitions U.S. Air Force target designators are both wide-ranging and diverse in scope and content. Their history can be traced back to visual observations of targets, to the use of markers such as a smoke, weapon sites or panels, later moving into radio, lasers, infrared, radar and/or GPS to direct precision guided munitions (PGMs) against enemy targets.
