models for analyzing the structure and content of human conversation and create artificial agents who can engage in human-like interaction with people and other agents.

## **Natural Language, Dialog and Speech (NDS) Symposium | The ...**

A dialogue system, or conversational agent, is a computer system intended to converse with a human. Dialogue systems employed one or more of text, speech, graphics, haptics, gestures, and other modes for communication on both the input and output channel. The elements of a dialogue system are not defined, however they are different from chatbot. The typical GUI wizard engages in a sort of dialog, but it includes very few of the common dialogue system components, and dialog state is trivial.
